

Course evaluation form

Your field of research?

Please answer the questions by using a number from the so-called 5-point Likert scale:

- 1 – I agree completely
- 2 – I agree
- 3 – I neither agree or disagree
- 4 – I disagree
- 5 – I disagree completely

- / – I do not wish to answer

You are welcome to further elaborate on the questions

The questions

- 1. The course has in the best way helped me to fulfill the learning goals
- 2. It was as a whole a good and instructive course
- 3. The instructors dealt with subject in a clear and easy understandable manner
- 4. There was plenty of opportunity to pose questions to the instructors
- 5. The instructors were active and helpful in facilitating comprehension
- 6. I developed a keen interest for multivariate analysis of biological data
- 7. I feel that I now master the skills that we have been taught during the course

- 8. I have obtained a good understanding for key concepts and principles within multivariate statistics
- 9. The interaction between the lectures and the computer lab exercises was excellent
- 10. I benefitted to a great extent from the computer lab exercises
- 11. The extent of the course material was generally appropriate
- 12. I will not hesitate to recommend the course to other PhD students if it is repeated
- 13. I will use the skills I have been taught in my PhD research project

Do you have any suggestions on how to improve the course:
